

Akash Soni

Full-stack Software Engineer

Raipur, Chhattisgarh, India | asoni7667@gmail.com | +91 7581912130 | [linkedin.com/in/akus0ni](https://www.linkedin.com/in/akus0ni) | github.com/Akus0ni | akus0ni.github.io

Full-stack Software Engineer with 6+ years delivering technical solutions for enterprise clients — from cloud data-platform migrations to API integrations used by healthcare and energy partners. Proven track record in SQL database engineering, AWS and Azure cloud architecture, and building reusable tools adopted across product lines. Hands-on experience in technical troubleshooting, stakeholder management, and end-to-end technical implementation that directly improves customer outcomes.

// Technical Skills

Languages & Frameworks	C# / .NET, .NET Core, .NET Framework 4.8, ASP.NET MVC, SQL, TypeScript, JavaScript, HTML, CSS
Cloud (AWS & Azure)	AWS Lambda, API Gateway, Redshift, DynamoDB, S3, CloudFront, Cognito, Secrets Manager, EC2, AWS CDK (IaC), Microsoft Azure
Data & Analytics	Database Engineering, Query Tuning, Data Modeling, SSAS, SSRS, ETL Pipelines, SQLite, Apache NiFi
Frontend	Angular (v19), Vue.js (v3), RxJS, Excel Add-In (Office JS)
Integration & APIs	RESTful APIs, High-throughput Integration APIs, Redox API (EHR), CSV/Excel Bulk Upload, NuGet Packaging, CLI Tooling
Security	JWT Authentication, Session Management, Access Control, Multi-tenant Isolation, Security Hardening (HIPAA-adjacent)
Practices	SOLID Principles, System Design, Microservices, Test-Driven Development, Data Structures & Algorithms, Cloud Architecture, CI/CD, LLM Integration, Prompt Engineering

// Professional Experience

Software Engineer — Energy Exemplar	Pune, India · Jun 2025 – Mar 2026
- Designed and delivered the Import/Export integration subsystem for PLEXOS Cloud in C# / .NET, packaging core logic as a reusable NuGet service library with a clean interface contract. - Built a cross-platform CLI tool on top of the NuGet library, transforming PTI Raw files into queryable SQLite databases. - Developed a desktop-style Excel Add-In (Vue.js UI) integrating with the backend service library. - Contributed to the EE Marketplace front-end using Vue.js.	
Software Engineer — eGain Communications	Pune, India · Sep 2021 – May 2025
- Designed and maintained high-throughput integration APIs in C# / .NET serving enterprise partners. - Led service-oriented modernization of the analytics layer, migrating from SSAS to AWS Redshift with Apache NiFi data flows. - Automated operational workflows using .NET Core, AWS Lambda, EC2, and Secrets Manager. - Produced and customized SSRS reports delivering stakeholder-facing insights.	
Software Developer — IKS Health	Mumbai, India · Feb 2020 – Sep 2021
- Hardened access control for the Scribble WFM platform by engineering a JWT-based authentication module. - Integrated the platform with the Redox API for real-time EHR data exchange. - Developed a generic CSV/Excel bulk-upload integration using Angular with ASP.NET MVC. - Designed a performance leaderboard to drive continuous improvement metrics.	

// Projects

AI-Powered Review Intelligence	Serverless SaaS · 2026
- Designed and shipped an end-to-end full-stack serverless SaaS solo; customers scan a QR code, tap a star, and receive 5 AI-generated review suggestions in under 30 seconds. - Architected the serverless AWS stack with AWS CDK: API Gateway, Lambda (Node.js 20, ARM64), DynamoDB (on-demand), S3 + CloudFront (OAC), Cognito (JWT), and Secrets Manager. - Built a provider-agnostic LLM client to hot-swap Claude / Gemini / any OpenAI-compatible endpoint without redeploy; hardened multi-tenant isolation with block-all-public S3 and JWT-derived tenant scoping.	
AWS CDK Lambda DynamoDB Cognito CloudFront LLM	
Import / Export Service Library & CLI	Reusable .NET library
Designed a reusable NuGet service library and cross-platform CLI packaging core integration logic, with a clean interface contract so multiple product surfaces (CLI, Excel Add-In, cloud) reuse one core.	
C# / .NET NuGet SQLite CLI	
Analytics Platform Modernization (SSAS → AWS Redshift)	
Migrated enterprise analytics from a legacy SSAS stack to AWS Redshift — redesigned ETL pipelines, refactored the data-access layer, and introduced automated validation to de-risk the cutover.	
AWS Redshift Apache NiFi ETL C# / .NET	

// Education

CDAC ACTS, Pune	2020
Post Graduate Diploma in Advanced Computing — 80.5%	
NIT Raipur	2017
B.Tech in Information Technology — CGPA 7.55 / 10	

// Certifications

Introduction to Cloud Computing — Coursera	Jan 2024
Prompt Engineering — How to Talk to the AI — LinkedIn Learning	Aug 2025
