/* Full-stack Software Engineer with 6+ years delivering technical solutions for enterprise clients — from cloud data-platform migrations to API integrations used by healthcare and energy partners. Proven track record in SQL database engineering, AWS & Azure cloud architecture, and building reusable tools adopted across product lines. Hands-on in technical troubleshooting, stakeholder management, and end-to-end delivery that directly improves customer outcomes. */

// Technical Skills

Languages	C# / .NET, .NET Core, .NET Framework 4.8, ASP.NET MVC, SQL, TypeScript, JavaScript, HTML, CSS
Cloud	AWS Lambda, API Gateway, Redshift, DynamoDB, S3, CloudFront, Cognito, Secrets Manager, EC2, AWS CDK (IaC), Microsoft Azure
Data & Analytics	Database Engineering, Query Tuning, Data Modeling, SSAS, SSRS, ETL Pipelines, SQLite, Apache NiFi
Frontend	Angular (v19), Vue.js (v3), RxJS, Excel Add-In (Office JS)
Integration & APIs	RESTful APIs, High-throughput Integration APIs, Redox API (EHR), CSV/Excel Bulk Upload, NuGet Packaging, CLI Tooling
Security	JWT Authentication, Session Management, Access Control, Multi-tenant Isolation, Security Hardening (HIPAA-adjacent)
Practices	SOLID, System Design, Microservices, TDD, DSA, Cloud Architecture, CI/CD, LLM Integration, Prompt Engineering

// Professional Experience

Software Engineer @ Energy Exemplar

Pune, India · Jun 2025 – Mar 2026

- \$ feat(plexos-cloud): ship Import/Export subsystem as a reusable NuGet library
- Designed and delivered the Import/Export integration subsystem for PLEXOS Cloud in C# / .NET, packaging core logic as a reusable NuGet service library with a clean interface contract.
 - Built a cross-platform CLI tool on top of the NuGet library, transforming PTI Raw files into queryable SQLite databases.
 - Developed a desktop-style Excel Add-In (Vue.js UI) integrating with the backend service library.
 - Contributed to the EE Marketplace front-end using Vue.js.

Software Engineer @ eGain Communications

Pune, India · Sep 2021 – May 2025

- \$ refactor(analytics): migrate SSAS analytics layer to AWS Redshift
- Designed and maintained high-throughput integration APIs in C# / .NET serving enterprise partners.
 - Led service-oriented modernization of the analytics layer, migrating from SSAS to AWS Redshift with Apache NiFi data flows.
 - Automated operational workflows using .NET Core, AWS Lambda, EC2, and Secrets Manager.
 - Produced and customized SSRS reports delivering stakeholder-facing insights.

Software Developer @ IKS Health

Mumbai, India · Feb 2020 – Sep 2021

- \$ fix(security): harden access control with JWT auth on Scribble WFM
- Hardened access control for the Scribble WFM platform by engineering a JWT-based authentication module.
 - Integrated the platform with the Redox API for real-time EHR data exchange.
 - Developed a generic CSV/Excel bulk-upload integration using Angular with ASP.NET MVC.
 - Designed a performance leaderboard to drive continuous improvement metrics.

// Projects

AI-Powered Review Intelligence

Serverless SaaS · solo build · 2026

- Designed and shipped an end-to-end full-stack serverless SaaS solo; customers scan a QR, tap a star, and receive 5 AI-generated review suggestions in under 30 seconds.
- Architected the serverless AWS stack with AWS CDK: API Gateway, Lambda (Node.js 20, ARM64), DynamoDB, S3 + CloudFront (OAC), Cognito (JWT), Secrets Manager.
- Built a provider-agnostic LLM client to hot-swap Claude / Gemini / any OpenAI-compatible endpoint without redeploy; hardened multi-tenant isolation with block-all-public S3 and JWT-derived tenant scoping.

AWS CDK Lambda DynamoDB Cognito CloudFront LLM

Import / Export Service Library & CLI

Reusable .NET library

- Designed a reusable NuGet service library and cross-platform CLI packaging core integration logic, with a clean interface contract so multiple surfaces (CLI, Excel Add-In, cloud) reuse one core.

C# / .NET NuGet SQLite CLI

Analytics Platform Modernization (SSAS → AWS Redshift)

- Migrated enterprise analytics from a legacy SSAS stack to AWS Redshift — redesigned ETL pipelines, refactored the data-access layer, and introduced automated validation to de-risk the cutover.

AWS Redshift Apache NiFi ETL C# / .NET
