

Akash Soni

Full-stack Software Engineer

Raipur, Chhattisgarh, India · asoni7667@gmail.com · 7581912130

Software engineer with 6+ years delivering technical solutions for enterprise clients - from cloud data platform migrations to API integrations used by healthcare and energy partners. Proven track record in SQL database engineering, AWS cloud architecture, and building reusable tools adopted across product lines. Hands-on experience in technical troubleshooting, stakeholder management, and end-to-end technical implementation that directly improves customer outcomes.

Work Experience

Software Engineer at Energy Exemplar

Pune, India (Jun 2025 - Mar 2026)

- Designed and delivered the Import/Export integration subsystem for PLEXOS Cloud using C#/.NET, packaging core logic as a reusable NuGet service library with a clean interface contract
- Built a cross-platform CLI tool on top of the NuGet library, transforming PTI Raw files into SQLite databases
- Developed a desktop-style Excel Add-In (Vue.js UI) integrating with the backend library
- Contributed to the EE Marketplace front-end using Vue.js.

Software Engineer (Professional Engineer) at eGain Communications

Pune, India (Sep 2021 - May 2025)

- Designed and maintained high-throughput integration APIs in C#/.NET
- Led the service-oriented platform modernization of the analytics layer, migrating from SSAS to AWS Redshift
- Automated operational workflows using AWS Lambda, EC2, and Secrets Manager
- Produced and customized SSRS reports delivering stakeholder-facing insights.

Software Developer at IKS Health

Mumbai, India (Feb 2020 - Sep 2021)

- Hardened access control for the Scribble WFM platform by engineering a JWT-based authentication module
- Integrated the platform with the Redox API for real-time EHR data exchange
- Developed a generic CSV/Excel bulk-upload integration using Angular with .Net MVC
- Designed a performance leaderboard to drive continuous improvement metrics.

Projects

Import/Export Service Library & CLI

- Designed a reusable NuGet service library and cross-platform CLI that packaged core integration logic for PTI Raw file transformation.

Analytics Platform Modernization (SSAS to AWS Redshift)

- Led migration of enterprise analytics from a legacy SSAS stack to AWS Redshift
- Redesigned ETL pipelines, refactored the data-access layer, and introduced automated validation.

JWT Auth Hardening for Healthcare SaaS

- Resolved critical security vulnerabilities across a HIPAA-adjacent clinical SaaS platform -- engineered JWT authentication, corrected session management flaws, and secured document-management services.

AI-Powered Review Intelligence

(Apr 2026 - May 2026)

- End-to-end full-stack SaaS, designed and shipped solo as a side project — built collaboratively with Claude Code (Anthropic) as a pair-programmer
- Customers scan a QR, tap a star, get 5 AI-generated review suggestions in <30s
- Architected a serverless AWS stack via AWS CDK (API Gateway, Lambda Node.js 20 ARM_64, DynamoDB on-demand, S3 + CloudFront with OAC, Cognito JWT, Secrets Manager)
- Built a provider-agnostic LLM client — hot-swap Anthropic Claude / Gemini / any OpenAI-compatible endpoint without redeploy
- Plus-tier owner dashboard with scan analytics, QR generator, and self-service shop config
- Block-all-public S3 + JWT-derived shopId (never trusted from request body) for hardened multi-tenant isolation.

Education

CDAC ACTS, Pune

(2020)

Post Graduate Diploma in Advanced Computing
80.5%

NIT Raipur

(2017)

B.Tech in Information Technology
CGPA 7.55 / 10

Certificates

- Introduction to Cloud Computing Jun 2025
- Prompt Engineering -- How to Talk to the AI Jun 2025
